

# ALGORITHMIA

Securely deploy,  
serve, and manage  
ML models three  
different ways.

## Team

- Multi-tenant platform
- Pay as you go
- Volume discounts
- Fastest access to new features
- Click-through TOS
- Flexible billing options
- Business hours email support
- 24/7 platform monitoring

[Sign up >](#)

## Managed | ENTERPRISE

- Single-tenant platform
- Private VPC on AWS or Azure Clouds
- SSO Integration
- Logging, metrics, and auditing
- Support response SLA
- 24/7 email and dedicated Slack support
- White labeling
- Dedicated customer success manager
- Managed and monitored platform
- Optional: provided and managed infrastructure

All options include:

- Data and model training platform integrations
- Latest hardware support CPU/GPU; GPU optimization
- Algorithm management API and UI
- External source code repository support
- Full language and framework support
- Administration API and UI
- Learning management system

Optional services:

- Implementation and deployment
- Advanced developer and administrator training
- Custom language pack and data connectors
